

Welcome to the dance performance *Miramos* for children ages 4-8 – with recorded audio description.

In *Miramos* we meet four unusual creatures who are on a visit to our blue-green planet. They investigate our world with curiosity and fascination. But where do they come from and what are they actually doing here? *Miramos* is performed by Danskompaniet Spinn and was created by Norwegian Choreographer Torgunn Wold and Spanish Dramaturg Paulo Serantes taking inspiration from the works of artist Joan Miró. It is now our great pleasure to be able to offer recorded audio description at every performance!

This is how it's done

We always bring the audio description equipment so that 20 people can use it simultaneously. There is no need to book or give notice in advance, and there are no additional costs for using the equipment. But please make sure to be at the venue in good time before the performance so we can set everything up before the performance starts.

The equipment consists of a receiver which receives the recorded audio description and a pair of headphones. Our tour manager or our technician on site will help you turn on and adjust the equipment properly. You can adjust the volume yourself or ask our tour manager or technician to help you out. You are free to use your own headphones should you want that – we have a total of 6 receivers where you can use your own headphones – and we recommend you only have the headphones over one ear as the music in the performance is played through the venue's regular speakers. The audio description is available in Swedish, English, Norwegian and Finnish. Please note that currently we can only offer two languages simultaneously per performance. The audio description is developed in collaboration with Audiosyn and an external reference group.

Do you have any questions or thoughts on how this is done?
